

Attention Customer!

CHECKING YOUR WATER SERVICE LINE MATERIAL

If this trailer/worker is in front of your house, the Water Authority is checking your water service line.

What should you expect?

- **Your water service is not being turned off.**
- No action by the customer is required.
- The Authority will not enter your premises.
- The service line on both sides of the meter (provider and customer) will be inspected.
- This initiative is required by the EPA.

What are water service lines?

Water service lines are the pipes that connect your home/business to the main water supply.

Why is the inventory being conducted?

EPA is requiring all water systems to determine service line material for both the customer & system side of all water services.

**For concerns or questions, please contact
Brad Jeffares at (706) 993-6230.**
